Subject Bathymetry

Gina and Cara,

Attached is the bathymetry chart that Joe Germano gave to us yesterday as a guide to the images that he displayed. The triangle labeled "Envirotech Diving Survey Area" shows the marker points that Tim Jewell used in doing dive surveys. It does not indicate the location or size of the pile, just his reference points for diving. The triangle labeled "Magone Dredge Area" shows marker points that Magone used in his pre-dredge survey. Again, they don't indicate the location or the extent of Pile A, just his reference points.
